

siliPINT™

life is better sili.

What is a Silipint?

- Silipints are drinking glasses made of silicone, giving a non-slip rubber-like feel.
- Unbreakable FDA approved, BPA-Free food-grade silicone
- Tolerant from -150°F to 600°F
- Flexible, packable & light
- Use in freezer, microwave, even put it on the BBQ!
- Prevents the growth of fungus, mold or bacteria

Functional?

While Silipint products are malleable & packable, they're sturdier than you think. A 12oz or 14oz pour of your favorite drink sits safely in a Silipint. They can be used while grilling, at patio parties, camping, beach or traveling. Silipint glasses can take a serious beating; they'll just bounce back to life for another round!
